Description

This vessel is located in Sydney NSW

This 2018 Technohull's SeaDNA 999 model is our most tricked/specced up Technohull in Australia. She is also commercially endorsed for charter (12 pax) and can be run as a business, offsetting your running and berthing costs.

A 34-foot, 90-knot RIB. The Greece-based builder created this RIB for extreme performance with twin 400 hp outboards, offering top-end speeds from 68 to 90 knots pending water conditions.

Measuring up at 10.3 m (34 ft) long with a beam of 2.8 m (9 ft), the team at Technohull has designed the boat to be versatile.

The captain and their passenger sit on wraparound shock-absorbing seats, faced with a "Smart Central Console Touchscreen." Along with three conventional gauges, most of the major controls in the boat are handled by the giant touchscreen on the right of the console. That means everything from draining the decks to checking the battery voltage uses the same simple interface.

This Technohull comes with 12' touchscreen with maps and sounder, high-performance marine audio/Mp3 subwoofers and amplifier. The helm area is protected by a T-Top (hardtop) for those long days in the Australian sunshine.

A wet bar and sink, extra LED special deck lights, a remote anchor winch control, shore power, and charger.

The bow thruster addition to this vessel really helps on those windy days when berthing.

Replacement value - \$450 000 Contact Agents - Drew Watney +61 459 124 914 / Brock Rodwell +61 408 303 203
